Color Re

Two rings are included in the price. For better use you have to specify the focus distance. If not specified, emitter is focused for infinity. Line lenses with spread 5° , 20° , 30° , 45° , 90° available. The line has a wide, at a distance of mm 1000 from the emission point and perpendicularly to laser beam, as it follows: 05° spread = mm 70; 20° spread = mm 310; 30° spread = mm 660; 45° spread = 800mm; 90° spread = mm 1800. You have to specify the spread that you wish. If not specified, emitter is shipped with a 90° spread lens. The visibility and the lenght of the line depend on the mounting of the laser and the brightness of the environment. Other optical projections available on request
